

We're about service!

We pride ourselves in being one of the most versatile and flexible companies in Namibia

Our core speciality is off-grid, fully functional container conversions anywhere, no matter how remote the location. We take charge from conception, through construction to delivery and setup - even an ongoing maintenance plan.

Since 1996, Cowboy's Group of Companies has expanded from construction to include everything from rigging and steel manufacture to luxury container conversions, the setup and management of remote camps, powder coating, farming, catering, transport, and translocation of large animals, as well as rental solutions.

Headed by Heinz 'Cowboy' & Ulla Büttner, and recently joined by Marco 'Cowboy Junior' Büttner, with a Master's Degree in Metal Construction, Cowboy's Group of Companies has a reputation for exceptional service, quality products, and delivering truly turnkey solutions.

We give our clients one point of contact to a resourceful, connected team willing to take on anything

Moving your camp or building a new one - we are your solution

From disaster relief to mining, oil and gas exploration camps, film crew support and remote filming locations, we have the expertise, local know-how and experience to action quick camp set up's and moves.

Remote locations require full service support - we are that support. From set up to clean up, we supply all logistics no matter how remote your location. Cowboy's tried and tested off-grid model for remote camps is adaptable to any standards, logistical complexity or cultural diversity. We even handle the day-to-day running of your camp, including full service catering, housekeeping, water and power supply, access roads and perimeter fencing if required.

Nowhere is too remote

Our mission is providing the ultimate in remote camping experiences

From building the ultimate luxury camp, to functional full-service temporary or permanent bush camps, we've got it covered. We provide tents, decks, living areas as well as catering service, ablution units, and full service backup.

Our speciality is non-permanent structures - from placement to rehabilitation of the environment, we operate with minimum impact on Namibia's sensitive environment.

With decades of experience, we turn any off-grid location into an efficient living and/or working environment. From office space to workshops, comfortable living and ablution facilities, as well as full catering and cleaning services, we have the expertise to take responsibility for full day-to-day running of your camp, no matter the complexity of the operation.

Cowboy's solutions offer a lot more than just containers for hire

Camp Design and Construction: In-house design, supply and construction on location by our design team able to source and supply with optimal solutions including follow-up maintenance support.

Accommodation Management and Camp Administration: We supply staff and management accommodation including soft furnishings and office supply, Satellite-based communications systems as well as administrative support.

Full Service Catering: Much of the food supplied comes from our 3500 hectare farm providing fresh home-grown produce. We supply well-balanced nutritional meals of high quality, catering to any dietary requirements or cultural diversity.

Transportation is the core of our operation yet we are so much more...

Transport and Logistical Support: From helicopters to excavators, internal roads and walkways, fuel and water storage, waste control and incineration plants as well as perimeter fencing. Rig, plant or containerised load transportation, we have a large in-house fleet of vehicles and equipment able to handle any job.

Minimal Environmental Impact

Energy efficient environmental management:

From water supply and reticulation, to solar electrical supply, we ensure our impact on the environment is minimal..

We are passionate about hassle-free maintenance

Maintenance is our mission: We ensuring hassle-free service with full equipment support and follow up - we ensure:

- **site monitoring with exacting safety standards;**
- **monitoring and full maintenance of equipment such as generators, pipes and pumps;**
- **corrective maintenance to ensure equipment functionality;**
- **follow-up maintenance plan updated as required to ensure functionality;**
- **co-ordination of sub-contractors and suppliers to ensure smooth operation as all times.**
